

I want to make a website using an AI website builder. Please help me make the prompt for it. The website that I want to build is a digital birthday card website. There should be 5 stages in the digital birthday card. For stage one, the background should use the file photo named "star bg", when the user opens the website it should automatically pop up a text at the top-middle part of the website, the words should be "Happy 20th Birthday!", the text should appear in a typing animation slowly but not too slow, the font of the text should use "Comic Sans" in black colour, and the bottom of the text the file image named "MIFFY STAGE 1" should pop up simultaneously as the text is being typed, the image should be a medium size, not too small but not too big that it covers the entire website, it should appear right below the text and placed in the middle of the website. right below the "MIFFY STAGE 1" file image, a small white button in a pill-shaped design with a thin (around 2mm thickness) black border should appear right in the middle BELOW the image. the button should be interactive so I can click on it which should lead me to stage 2 of the website. on the button there should be the words "next :3" in the font "Fredoka" in the colour black. I want all the elements to be located near the center of the website but in order, so the text is in the top center of the website, the "MIFFY STAGE 1" image file should be located right in the middle and centre of the whole website, and the white pill-shaped button should appear in the bottom centre of the website. DO NOT MAKE THEM OVERLAP EACH OTHER, as a reference to the design please look at the image file "STAGE 1"

STAGE 2: stage 2 will appear AFTER the "next :3" button from stage 1 is clicked. the background for stage 2 will also use the image file "star bg". when stage 2 begins, another text should pop up in a typing animation with the words "i have a surprise for you, wanna see it?", the typing animation should not be too slow or too fast, the font for the text should use the font "Comic Sans" and be BOLD. the text itself should not be in one line but divide it into two lines, the first line should have the words "i have a suprise for" and the second line should contain the words "you, wanna see it". below the text TWO INTERACTIVE BUTTONS that can be clicked should appear, both the buttons should be in a white color, in a pill-shaped design with a thin (around 2mm thickness) black border, the first button should have the words "yes!!" and the second button should have the words "no thanks.". the button with the word "yes!!" should be on the left side, and the button with the word "no thanks." should appear on the right side. both buttons should appear simultaneously as the text in the top is being typed in. below the button the GIF file "miffy stage 2" should appear in the bottom centre of it, make the size a medium size, not too big and not too small. same as before i want all the elements to be located at the centre of the website but NOT OVERLAPPING ONE ANOTHER. the text should appear in the centre top part of the website, the buttons should appear in the middle centre of the website, and the GIF file "miffy stage 2" should appear in the centre bottom of the website. the buttons must be interactive and i need to be able to click them, when i click the "yes!!" button on the left it must lead to stage 3 of the website. please see the image file "STAGE 2" as a reference for the design i want and described.

STAGE 3: stage 3 of the website should be opened once the button "yes!!" from stage 2 is clicked. for the background of stage 3 it should use the video file "cherry vid bg" as the background, make the video play automatically there should not be a pause or play button, make the video an infinite loop. at the middle centre of the website it should appear the GIF file

"STAGE 3 BOX", make the GIF size a pretty large size, it should be almost covering the entire centre-middle part of the website but there should still be some space around the top-middle and the bottom-middle part of the website, i DONT want it to cover the entire middle section but just the centre part of it. below the "tap on the cake to open your gift!" text that is in the GIF file "STAGE 3 BOX" please add in the image file "CAKE STAGE 3" right BELOW it, the size should be small but not too small, and make that image interactive (like a button) so i can click it, when i do the click the file image it should lead me to stage 4 of the website. please reference to the image file "STAGE 3" for the design layout i want.

this is the description for STAGE 4 and STAGE 5 of the website, it is a continuation of the previous prompt.

STAGE 4: stage 4 should appear when the image file button "CAKE STAGE 3" is clicked, when the button is clicked please add in a confetti animation to the website like a surprise. the background of stage 4 should also use the video file "cherry vid bg", make sure the video is played in an infinite loop and there should not be any pause or play options. at the middle-centre of the image, the GIF file "STAGE 4 BOX" should appear, the size of the image should be quite large but not covering the entire website. there should still be space at the top-middle and the bottom-middle of the website. in the GIF file "STAGE 4 BOX" there is the text "it's a jellycat bunny!! :D", below that text please insert the image file "JELLYCAT" right bellow it, it should be placed the centre of the box. the size of the image should be small but not too small, it should not exceed the size of the GIF file and should remain inside of it at the centre. below the image file, there should be a white pill-shaped button placed the centre-bottom, the button should also be placed within the GIF file, and it should be interactive so I can click it which should lead me to STAGE 5 of the website. the button itself should have the words "my wishes" in the font "Fredoka" and make it BOLD, the words should also be typed in all lowercase. please refrence the image file "STAGE 4" for the design layout that i want and have described.

STAGE 5: stage 5 should appear once the "my wishes" button in stage 4 has been clicked. the background for stage 5 should use the image file "dots bg", make sure the background is seamless and there are no harsh cuts. at the centre-middle of the website the GIF file "STAGE 5 BOX" should appear covering almost the entire middle section, but make sure to leave some room at the top-middle and bottom-middle of the website, i do not want the GIF file to cover the website entirely from top to bottom but just the middle-centre of it.

CORRECTIONS

please raise the position of the image file "JELLYCAT", make the position at the centre of the GIF file "STAGE 4 BOX", the current position is overlapping with the button.

please make the image file button "CAKE STAGE 3" larger and raise the position up a bit, make it placed at the centre of the GIF file "STAGE BOX 3". the current position is too low and the size is still too small
